

# **MRI Lumbar Spine Report**

Certainly! Here's a concise MRI lumbar spine report focusing only on degenerative findings, based on the provided images:

## **MRI Lumbar Spine Report - Degenerative Findings**

**Technique:** Sagittal T2-weighted sequences were reviewed.

### **Findings:**

**Disc Desiccation:** Mild to moderate disc desiccation is noted throughout the lumbar spine, particularly at the lower levels.

**Disc Bulging:** There is evidence of diffuse disc bulging with mild posterior protrusion at multiple levels.

**Endplate Degeneration:** Mild Modic type 1 change at the L4-L5 level.

**Facet Arthropathy:** Mild facet joint degenerative changes are observed at multiple levels.

### **Overall Degenerative Classification:**

The degenerative findings demonstrate mild to moderate spondylosis and facet joint arthropathy.
