

MRI Lumbar Spine Report

MRI Lumbar Spine Report:

The MRI findings indicate mild to moderate spinal canal stenosis and foraminal narrowing at the L1-L2, L2-L3, L3-L4, and L4-L5 levels bilaterally, with severe stenosis at L4-L5 and L5-S1.

There is moderate foraminal narrowing at L4-L5 on the left side.

Subarticular stenosis is noted as moderate at L3-L4 and severe at L4-L5 and L5-S1 on both the left and right sides. The L1-L2, L2-L3, and L5-S1 levels show no significant findings (nan).

In summary, there is mild to moderate spinal canal stenosis and foraminal narrowing at multiple levels, with severe stenosis at L4-L5 and L5-S1. Subarticular stenosis is moderate at L3-L4 and severe at L4-L5 and L5-S1, with no significant findings at L1-L2 and L5-S1. Further evaluation and management may be necessary to address these findings and associated symptoms.
