

MRI Lumbar Spine Report

MRI Lumbar Spine Report:

The MRI findings indicate mild to moderate spinal canal stenosis and neural foraminal narrowing at L1-L2, L2-L3, and L3-L4 levels bilaterally, with moderate stenosis at L4-L5 and severe stenosis at L5-S1. The left side shows moderate subarticular stenosis at L3-L4 and severe stenosis at L4-L5. The right side exhibits moderate subarticular stenosis at L3-L4 and severe stenosis at L4-L5. No significant findings at L1-L2 and L5-S1 foraminal narrowing. The left subarticular stenosis at L1-L2 is not applicable (nan).

In summary, there is mild to moderate spinal canal stenosis and neural foraminal narrowing at L1-L2, L2-L3, and L3-L4 levels bilaterally, with severe stenosis at L4-L5 and L5-S1. The left side shows moderate subarticular stenosis at L3-L4 and severe stenosis at L4-L5, while the right side exhibits moderate subarticular stenosis at L3-L4 and severe stenosis at L4-L5. No significant findings at L1-L2 and L5-S1 foraminal narrowing. The left subarticular stenosis at L1-L2 is not applicable. Further clinical correlation and management plan are recommended.
