

MRI Lumbar Spine Report

MRI Lumbar Spine Report:

The MRI findings demonstrate mild to moderate spinal canal stenosis and foraminal narrowing at the L4-L5 levels bilaterally, with the left side showing moderate stenosis and the right side showing moderate narrowing. Additionally, there is severe subarticular stenosis at L4-L5 on the left side and severe stenosis at L5-S1 on the right side. The stenosis and narrowing at other levels (L1-L2, L2-L3, L3-L4, L5-S1) are mild to mildly severe.

In summary, the patient exhibits mild to moderate spinal canal stenosis and foraminal narrowing at L4-L5 bilaterally, with severe subarticular stenosis at L4-L5 on the left and moderate stenosis at L5-S1 on the right. Further evaluation and management may be necessary to address these findings and alleviate any associated symptoms.
