

# **MRI Lumbar Spine Report**

Certainly, here is a concise MRI lumbar spine report focused solely on degenerative changes, based on the provided images.

## **MRI Lumbar Spine Report - Degenerative Changes**

### **Findings:**

**Disc Degeneration:** Multilevel disc desiccation and loss of disc height are noted throughout the lumbar spine.

**Disc Bulging:** There are noted disc bulges at multiple levels. L5-S1 is notable for a broad based posterior disc bulge with mild thecal sac effacement.

**Facet Arthropathy:** Mild facet arthropathy is noted at several levels.

### **Classification of Degenerative Changes:**

**Mild to Moderate Degenerative Disc Disease.**

**Mild Facet Arthropathy.**

**Note: This report is limited to degenerative findings only and does not include evaluation of other potential pathologies. Clinical correlation is recommended.**

If you would like me to elaborate on a particular aspect or if there's anything else, feel free to ask!
