

MRI Lumbar Spine Report

MRI Lumbar Spine Report:

The MRI of the lumbar spine demonstrates mild to moderate spinal canal stenosis and foraminal narrowing bilaterally. The findings are as follows:

1. Spinal canal stenosis:

- L1-L2: Normal/Mild
- L2-L3: Normal/Mild
- L3-L4: Normal/Mild
- L4-L5: Normal/Mild
- L5-S1: Normal/Mild

2. Neural foraminal narrowing:

- Left:
 - L1-L2: Normal/Mild
 - L2-L3: Normal/Mild
 - L3-L4: Normal/Mild
 - L4-L5: Normal/Mild
 - L5-S1: Severe
- Right:
 - L1-L2: Normal/Mild
 - L2-L3: Normal/Mild
 - L3-L4: Normal/Mild
 - L4-L5: Moderate
 - L5-S1: Severe

3. Subarticular stenosis:

- Left: Normal/Mild
- Right: Normal/Mild

In summary, the patient exhibits mild to moderate spinal canal stenosis and severe neural foraminal narrowing at the L5-S1 level on both sides. Subarticular stenosis is mild bilaterally. Further clinical correlation and management plan are recommended based on these findings.
